For sixty million years the Necrons have slumbered, their tomb worlds filled with dormant armies and inactive war machines. Now they are awakening as if from half-remembered nightmares, and the galaxy shudders at their return. From vast crypt-fortresses, burnished legions emerge into the dying light of the 41st Millennium, a steel sea rippling beneath the crackling energy discharge of esoteric battle engines. Swarming metal Scarabs, talon-limbed horrors and spectral assassins accompany them, their alien minds focused on a single purpose - to reclaim the stars.

Codex: Necrons contains a wealth of background and rules - the definitive book for Necrons collectors. Within, you'll find:

- In the Beginning: the origin of the Necrons, from the Necrontyr race of flesh and blood that existed billions of years ago, their bitter civil war, the pact with the C'tan which doomed them to immortality and the order which set them to their Great Sleep;
- The Great Awakening: the manner in which the tomb worlds are awakening into the 41st Millennium - some early, some late, others not at all - and the Necrons' first, violent actions upon rousing;
- The Necron Dynasties: descriptions of the complex, rigid hierarchies of the Necrons, with details and icons of the following 8 dynasties: Sautekh, Charnovokh, Nephrekh, Thokt, Mephrit, Novoth, Ogdobekh, and Nihilakh;

dynastic territories;
