Download online boek Nederlands Forest Gardening Robert Hart , Forest gardening is a way of working with Nature which is not only productive and requires minimal maintenance, but creates great environmental benefits. As Herbert Girardet says in his Foreword, "Robert Hart was a rare person . . . For decades he waged a lonely battle for life, patiently writing books and articles and quietly planting trees on his small farm in Shropshire. Robert created a magnificent forest garden which had a profound influence on the way people have cultivated their own land. It was a garden dedicated to human needs for fruit, nuts, vegetables and plant medicines. But it was at the same time a celebration of the myriad interactions of life for it was based on profound observations, both intuitive and scientific, of how different life forms interact in order to stimulate and support one another.
