It's been known for years that usability testing can dramatically improve products. But with a typical price tag of \$5,000 to \$10,000 for a usability consultant to conduct each round of tests, it rarely happens.

In this how-to companion to *Don't Make Me Think: A Common Sense Approach to Web Usability*, Steve Krug spells out an approach to usability testing that anyone can easily apply to their own web site, application, or other product. (As he said in *Don't Make Me Think*, "It's not rocket surgery".)

In this new book, Steve explains how to:

Test any design, from a sketch on a napkin to a fully-functioning web site or application
Keep your focus on finding the most important problems (because no one has the time or resources to fix them all)
Fix the problems that you find, using his "The least you can do" approach
By paring the process of testing and fixing products down to its essentials (A morning a month, that's all we ask), *Rocket Surgery* makes it realistic for teams to test early and often, catching problems while it's still easy to fix them. *Rocket Surgery Made Easy* adds demonstration videos to the proven mix of clear writing, before-and-after examples, witty illustrations, and practical advice that made *Don't Make Me Think* so popular.
